eLearning

COURSE DESCRIPTION

This **AutoCAD & AutoCAD LT CORE: Sheet Compilation and Producing Outputs** course, similarly to the previous AutoCAD courses, provides text and video-based learning content, designed to teach new users of AutoCAD how to take their drawings and start producing outputs to both physical print and PDF. Each learning module is followed by exercises and knowledge checks, where relevant, to help users retain the information they've learnt. On completion of this course, users will be able to plot (print) and output their AutoCAD drawings to both PDF and physical paper.

COURSE MODULES

- Adding Dimensions
- Working with Text
- Creating Tables
- Understanding Annotation Styles
- Introducing Paper Space and Page Setup
- Creating Layouts and Viewports
- Creating First Title Block
- Printing Work
- Creating PDF Files
