AutoCAD Core: User Interface and Navigation

man and machine
eLearning

COURSE DESCRIPTION

This **AutoCAD & AutoCAD LT CORE: User Interface and Navigation** course provides text and video-based learning content, which is designed to teach new users of AutoCAD how to open, navigate and interrogate an AutoCAD DWG drawing. Each learning module is followed by exercises and knowledge checks, where relevant, to help users retain the information they've learnt. On completion of this course, users will be able to open an AutoCAD drawing and carry out some basic interrogation of the information it contains.

COURSE MODULES

- How to Open AutoCAD
- Opening, Creating and Saving AutoCAD DWG Drawings
- The AutoCAD User Interface
- Working with Workspaces
- Drawing Navigation
- Making Selections of Objects
- Working with Object Properties
- Taking Measurements of Geometry
- Knowledge Checks per Module
- Complete Step by Step Exercises
- Challenge Based Course Ending Exercise
