Autodesk Fusion CORE: User Interface and Navigation

man✕machine
eLearning

COURSE DESCRIPTION

This **Autodesk Fusion Core: User Interface and Navigation** course uses a mixture of text, imagery and video-based content to teach new users the basics of the Autodesk Fusion interface. During this course, users will get to grips with opening and creating models, navigating around their designs, as well as some high-level interrogation of their models. Each learning module is followed by exercises and knowledge checks, where relevant, to help users retain the information they've learnt.

COURSE MODULES

- How to Open Autodesk Fusion
- Opening, Creating and Saving Fusion Designs
- The Fusion User Interface
- Model Navigation
- Making and Customising Selections
- Taking Measurements of Geometry
- Regular Knowledge Checks per Module
