

Autodesk Vault CORE: Users

man machine
eLearning

COURSE DESCRIPTION

This **Autodesk Vault Core: Users** course offers mainly video-based learning modules, that explain a high-level overview and introduction to using Autodesk Vault. During this course, users will learn how to navigate the user interface, find their files and use the check in/check out version control functionality. The focus will be on using Vault inside of both AutoCAD and Inventor, as well as using copy design and the revision control functionality. On completion of this course, users will be able to manage their designs inside of Autodesk Vault, as well as work with revision control lifecycles, and intelligently reuse data.

COURSE MODULES

- How to Login to Autodesk Vault
- Access Autodesk Vault Professional Thin Client
- User Interface and Navigation
